

S-Line 2

The **S-Line 2** is a feature-rich Point-of-Sale solution at the forefront of innovation and design. As a truly all-in-one design you are able to reduce the overall counter space necessary to hold your system which allows you to use more space for advertising and merchandising.

Configured specifically for the movie theatre industry, this small-footprint station is a high-powered terminal that supports an Intel® i5 processor which allows you to run nearly any theatre software for both ticketing and concessions ordering.

Additionally, the **S-Line 2** is capable of accommodating a variety of rear-facing customer displays, including a 15" touch display that facilitates guest seat selection and concessions ordering for seat delivery. With a drop-in front-loading printer design, the **S-Line 2** makes changing the paper roll a quick and easy process, even for the most novice of employees.

TouchMate is proud to offer its customers the opportunity to finance their kiosk purchase through **Lease Corporation of America**. Qualified buyers have a variety of leasing options, including a \$1 purchase option at the end of the lease, that allow you to conserve your working capital and possibly earn tax savings under IRS Section 179.

S-Line 2 Specifications:
